

RoHS Declaration of Conformity

Manufacturer : **COGELEC SA**
Address : **370, rue de Maunit - 85290 - Mortagne sur Sèvre – France**

The RoHS 2015/863/UE directive aims to reduce risks to health and the environment by replacing and restricting chemical and dangerous substances in all of the listed raw materials.

COGELEC recognizes its responsibilities with regard to the environment and its customers.

With the arrival of the RoHS3 and WEEE (Waste from Electrical and Electronic Equipment) directives, we have reviewed our processes and the storage of our data to ensure that we are in a position to fulfil our various responsibilities under these directives.

As manufacturer of the INTRATONE, brand, we respond to our customers' requirements by supplying products in accordance with the established specifications. However, it is incumbent upon our suppliers to specify in detail the exact specifications of the materials they use.

In light of this, COGELEC can only certify that the chemical properties of its products intended for resale are compliant with the RoHS directive.

This declaration regarding chemical properties and RoHS compliance remains the responsibility of our component and raw material suppliers.

We hereby confirm that COGELEC is committed to being able to determine the RoHS status of its INTRATONE-branded products, by storing all of its suppliers' data.
